

**S.G. CIRCULAR NO. 14/1934**  
**:: Costing Of Surveyor's Work ::**

In preparing the dissection of a Surveyor's costs on the back of the diary form the following method of computing the cost of a day's work is to be adopted:-

- |   |  |
|---|--|
| (1) Cost of days on leave or<br>on duty without coolies ) | = $\frac{\text{Salary + Allowances}}{\text{Possible effective days}}$                    |
| (2) Cost of working day                                   | = $\frac{\text{Total expenses minus (1) as above}}{\text{Actual working days}}$          |
| Possible effective days                                   | = Days in month minus Sundays,<br>holidays and days on which rain<br>prevented all work. |

A.R. WHITE  
 For Surveyor General,  
 F.M.S. & S.S.

Dated: 27<sup>th</sup>.November, 1934.
